

Help with a legal matter:

There is a 5-year-old girl named Madeline Kramer in Peru IL.

There is a dire need for legal rectification due to severe corruption where there are corruption matters of a severe nature. She was taken by DCFS and put in a place where abuse and harm was occurring.

There are many witnesses who are also concerned for her safety and who have seen abuse signs or disclosures from her and who also testified and reported these things to police or DCFS. There are no helpful authorities around who are capable of diagnosing abuse signs and things went way out of control beyond the scope of anything normal or that I was capable of handling in a lot of ways.

In need of assistance due to the fact that there are no resources in the area who are qualified to help intervene to help our children, my child in particular.

I have tried to ask the authorities for help but they were all corrupt and aided to get the child with her father, who has a mild to severe form of schizophrenia, in efforts to add her to a rape and pedophile club locally. I have been made fun of, and picked on for trying to do the right things for hers and my future. There are boys locally who claimed to have been paid off by politicians who were aiming to kill me so they can apparently have Madeline in the pedophile club without any problems stemming from them neglecting to protect her from abuse. I have tried calling the F.B.I. of Chicago Illinois and they reported to me that they were not going to be investigating, although I saw their Wi-Fi pop up on my screen at few times at Starbucks. A friend of mine, Lawrence Obryen, I met there, told me she was already under investigation by the F.B.I. I was made aware that they do not tell people though, whether they have an investigation going on or not. I need this matter looked into in a timelier fashion as there were not only death threats made to me but also my daughter, 5-year-old Madeline. Her father had threatened to kill her and me in descriptive detail of how he would go about this. There is a video of a threat on a YouTube video that he made a while back, about 4 months after she was born. The authorities were made aware about all of the threats and continued to do nothing. They are under investigation for corruption and conspiracy surrounding several other things locally, and some news about this can be found on the Edgar county watchdogs website of Illinois, about LaSalle County, Illinois. It apparently is the most corrupt county in the state of Illinois. There are a lot of complaints and people in danger from them and by this. Even at times when the F.B.I. helps, investigations can take too long, and if not properly qualified to resolve the matter sooner, people may die and more crimes ensure due to taking too long to investigate. Fiber Optics used by CIA, private detectives, or DEA officers, can immediately obtain knowledge from ones computer or devices in order to produce a case file, instead of barely getting by with smaller forms of investigation used by the F.B.I. which they sometimes claim that even then, they weren't able to do.

A friend of mine, Julie Ajster, told me she is a local lawyer and one of the prosecutors of corruption and fraud from authorities in the area. She said that the authorities were so bad to her, that they went on trips paying for illegal wiring and tapping services to cover their footsteps and wasting tax payer's dollars while doing this. They bought her out of her law office trying to scare her out of town, bullying her publicly and telling her to move even though she was trying to be a decent, noble and upright authority figure for the community, which we all want and need.

The whole community is practically uproaring, upset and protesting about everything. Ms. Julie Ajster was about fresh out of college when they all tried bullying her instead of letting her lead a normal and adequate life. Her husband ended up passing away due to stress related illnesses caused by the stresses of harassment from authorities. She told me I was not alone. Although frightening, this was very assuring. Another local politician, mayoral candidate Rodney Perez, told me that he found that the Mayor was embezzling money, among many other corrupt things that were going on in the community. The F.B.I. apparently investigated, but ruled in a way where I am not sure if the embezzling Mayor, Mayor Harl of Peru Illinois, was held solely responsible but he was found guilty of embezzlement.

He was allowed to re-run as mayor even though the town code specified that any mayor found guilty of embezzlement is to be removed and prevented from being allowed to run for office again. Despite this, he ran again and was re-elected as mayor against Mr. Perez. Mr. Perez is the best thing for Peru in my opinion where as far as a Mayoral candidate would be concerned. He has everything lined up to make America and Peru great again and under the condition he would be allowed to provide mayoral services, they would be more adequate than the community has ever seen. It is really broken in Peru, Illinois. I never lived there before I had my child and had moved there from my homeplace of Princeton, Illinois, Bureau County, about 30 miles west of there. I never saw the corruption like in Peru, anywhere else in my life. For starters, there is no Park district. Locals and people in charge are frequently mishandling money. There was about a million-dollar frivolous lawsuit based on false claims. There is misuse of public funds, mismanagement of money, operating out of the police station for the city of Peru without any additional services like a park district. This as well as many other things they do, go against and blatantly disregard state code. They have run many illegal operations from LaSalle county, Illinois. There are cameras directly on the female toilets in the bathroom of Peru, Illinois holding cells in the police station, where they laugh and balk at people as they watch them use the facility, instead of having privacy for their bodies, or taking the camera out of there as it is a serious invasion of privacy. There are no sidewalks on a vast majority of roads in Peru like near parks where women and children and families would be. Women walk baby's through the grass with their strollers and that is where children are forced to ride their bikes. I have considered

petitioning for new sidewalks to be put in. One time I had baby changing tables installed in the bathrooms of all of Lasalle-Peru Parks with a simple phone call, where they flaunted the credit was all theirs and it was their idea. I wanted no credit but began to see a pattern.

The only way things would get done is if people were petitioning these people to do the jobs they should be doing already, like Julie, Rodney, and myself some, but in response we and other people who try to help make the community a better place, get extremely harassed, picked on and bullied.

The chief of Police, Douglas Bernabei, was previously a chief of police in Spring Valley, Illinois, where a man was shot in reference to where a police officer under Bernabei had shot the man, and it was covered up. Story after story of corruption, yet there was never any reprimanding of Mr. Douglas Bernabei. His brother is a judge at the Bureau County Court house, in Princeton, Bureau County, Illinois.

Doug proceeded to send officers to my house quite frequently in a harassing manner, while I had my infant child there, in efforts to what appeared to be a bullying mechanism to scare me out of the town. My child father's parent's worked at the city of Peru there, and not to blaspheme but genetic schizophrenia runs in his family, where there is a genetic deformity or mutation which cases the chromosomes in their dna to make their brain functioning falter. There are little to no resources in the area for this. They appear to have a cult, clan and mob mentality. They use people like this to help them carry out their evil deeds, such as ones who would never tell or are too weak or not all there mentally, like my child's dad with the pedophile scenario.

DCFS Supervisor Denise Flores admitted to having behind the scenes meetings with the father's attorney, who is an in-law to the father's mom, Mary. DCFS supervisor Denise Flores expressed she corruptly falsified documents to get the child ripped from mom and put with the dad, who had harmed her, and threatened to kill her and there was a surplus of evidence of the harm and abuse he was subjecting her to. There was a surplus of documents written by DCFS admitting to the abuse she was experiencing by him, but they corruptly placed her with him anyways.

This went against their protocol, policy, legal proceeding, and law. The DCFS worker committed a grand act of deliberate child endangerment, conspiracy, fraud and ethical breaches, upon many other things.

This woman was to have a shelter care hearing at the DCFS agency if she wanted to take the child, but she avoided following proper procedure and allowed this child to be harmed, or even potentially killed, given the nature of the evidence. The father does not have a good head on his shoulders. His brain is malfunctioning and he needs medical attention for this. Gene therapy might help but there are no doctor's who specialize in this sort of thing in this area. He drinks and has drug and personality problems. He comes from a family of abuse, is an only child and severely abusive. He doesn't have his daughter's best interest as he has expressed in grave detail on multiple occasions.

There were times where he would ritually abuse her, and I didn't know if I would see my daughter again. The authorities in charge think it's funny. They are not all there mentally either. I am not sure if they have mental diseases but there is little to no clearance to obtain these jobs that one should first obtain proper testing like brain scans and pupillary response tests to rule out any potential for their brain being diseased.

I believe when this occurs, they operate from low or wrong standards, which play out through their wrong doings, not because they choose to but because there is a brain problem stemming from a missing or damaged chromosome in their dna, which is linked to brain problems. At times, they can play out as narcissism, hide, hardly seem like hardly any problem is there at all, be severe or play out more so over time.

In these cases, wrong doings which can stem from brain faltering, need to be looked into through physical exams like brain scans, instead of just excusing the matter as if they should know better or assume there is nothing underlying wrong without any scientific evidence like brain scans or dna chromosome tests, first. In the case there is lots of corruption, wrong doing, and harm to the people being caused by wrongs from authority, there is no use keeping them, and allowing them to continue wreaking havoc on their own community. We should at least be afforded a review, or a shift of police, seeing what other possibilities there are to resolve the issues instead of just letting the wound fester.

Abuse is running rampant and wreaking havoc on this area and the people in it and who know about what the authorities are allowing to go on.

Chief of Police Doug Bernabei divorced his wife and had turned gay, gone off the deep end, been abusing people of the community, women, and even his own police officers. He has been reportedly enforcing his officers to get in on sex crimes, committing entrapment, at times forcing them to not do their jobs, and threatening to fire them if at times they do. He promotes a more criminal type of police force. After divorcing his wife, he became predominately misogynistic and extremely abusive and hostile toward women and children, making the atmosphere as uncomfortable and hostile as possible for us as well as preventing us from moving on or forward with life due to stifling legal problems caused by their abuse and harassment to us. The more they bury us in papers and legal problems, the better for them apparently. They are provided for by the state, and we need them to be there for us if we need help, yet they are the ones causing us such severe problems that our normal duties, routines and family lives take a back burner to the striking and harsh treatment from local authorities. Sometimes, we are not even able to carry on doing our daily jobs due to the harassment being so severe.

These people, mainly Chief Doug Bernabei are ordering officers to harass people, make up false claims against them, and trying to ruin their lives. Julie Ajster is a great advocate of this.

This happened to me and my daughter and my life hasn't been the same since. Although I used to pay for a lawyer but now the abuse locally has grown too severe and I am in need of help for affording legal fees due to severe maltreatment and injustice.

As I mentioned earlier, there were apparent threats from multiple individuals that they were paid off by politicians to play roles of hit men, and to kill me.

I was told to shut up and get out of the Police Station when I went there to report this once. They refused to deal with me, and also refused to transfer this or any other matter to a county that would care enough to help an innocent girl like me. At this point in my life I can't imagine I'd ever deserve such atrocious treatment from the men in blue.

At times, officers said it was Police chief Doug Bernabei's orders to not respond to any calls pertaining to me. He bullies me. He claims he knows the father's family, and despite their crimes and abuse, treats them like royalty, and although I've done nothing wrong, belittles me and tries to make my life a living hell. He frequently does this to women, including Ms. Ajster for example, at any cost.

It seems nonsensical to me, as we are not trying to give them a hard time and feel as if those types of harsher methods are best served for tough and dangerous criminals who are physically confronting police or something similar. The way they treat people is incredibly hostile. They will yell and scream at women and punch their fists down on the table, in a physically threatening and hostile manner. This personally happened to me. I have witnessed the police scream and rant and rave through the office like psychopaths griping about things of no importance or relevance to anything pertaining to their jobs. They just like to pick on people. I believe the chief is mentally ill, ever since the breakup with his wife. If he is taking that out on people, especially women it sure shows. His fellow officers are led by poor example by this, and as I have seen, are acting out in response to not having better leadership. They too, are crumbling because of this, and it is sad to see them led by a bad example, not have better and not being led by a more upright leader who can be healthy for the officers and community. Police officers are being forced to commit crimes stemming from entrapment from Bernabei's orders which are causing even young officers in training to jeopardize their entire lives and careers as police officers before they have even barely begun.

Recently, the county has gone broke. Bernabei petitioned to consolidate with all surrounding four town's police agencies, where he would be able to use their money. When petitioning this, if an investigation came up, he would pawn it off on them and refuse to help. He frequently does this. Whenever a serious situation arises, he called someone else to handle it, like this summer, he called the FBI and Morris police department handle an issue that local authorities should have been able to handle on their own. I believe he isn't an adequate authority, isn't playing his part in the American government system and to my belief, it has been his time to go for a very, very, long time.

There are not periodic reviews or psych checks and it seems as if the police chief is in need of release from the job. There is still a job to be done, and he is being paid to not do it, so it seems. It really seems like we have no authority at all. The mayor isn't valid and the chief of police is a rude bully who never does his job and enforces his officer's to commit and cover up crimes. There seems to be no justice at all.

When mayoral candidate and recent ex-fireman due to harassment, Mr. Perez petitioned to run a park district, as a town of this size should have, the mayor and police chief denied to make space for and allocate funds for this. Rodney ran one anyways out of charity and has lots of nonprofit organizations to make the city great. Churches also pitch in to help do what the city should be doing. A park district would make the city safer and create more jobs.

Combining the towns of LaSalle Peru, there is about 35,000 people, and yet there is no park district. This is absolutely ridiculous. There are no maintenance of parks, rusty old swings, chipping paint, and no one to provide services for any of these types of things. A park district is the proper way to maintain the town but Peru isn't for the people, and there are a lot of kids and families there. This is no way to live. They overdo roads again and again to pocket money from it, instead of make it right the first time. Sidewalks they do have are elongated curbs immediately off the side of the road and next to cars, which is completely unsafe for women and children and anyone who walks on it in general. I'd like to make the sidewalks 5 foot off the road with trees or shrubs in between, for better safety purposes. We need authorities who care about the community, health of it and the people in it. It is very hard to make it here, with the way they seem so degenerative and careless about human life, unless they are deriving pleasure from bullying us.

In 2018, we are advancing and should always be educating ourselves and growing, but here, they don't want to do their jobs, grow or change. They pick on nice people who do what they can to help and only want normal, happy lives and to contribute to life in a positive way.

This creates an atmosphere of animosity. There is no excuse for this. I believe they are just the wrong men for the job. We need new everything, a new mayor, a new chief, a park district to take care of the city. They are going around bullying people, buying out helpful lawyer's offices, and people's homes, trying to scare people away as if they have the privilege to do this. The city isn't even able to operate or fulfill its primary duties let alone be that privileged to go around bullying people for fun when there is always work to do and their job still needs done. The Chief seems to like to bully people, and that it makes him feel manly. I believe he has emotional problems and we are all suffering because of it.

1. There is still a job to do, which he is getting paid for and that he is not doing and is pawning his job off on others, whose job it isn't to do his job. This is unfair and a waste of money for an authority position. He is taking money from the state, and not doing

what it is for. The job remains open, it seems like. We can't turn to the city or police for anything around there unless we want to get bullied.

2. It shows people that if you are nice, you will be picked on, which is a minor form of terrorism as it can cause public disturbances, and mental disorders of the people abused by the harassment or suffering from the corruption. Their job is in place for a reason and it is not to abuse, harass or bully people, which is similar to terrorism. It can make people turn against their own government.

3. Terrorism. He is leading by example, setting a bad tone, causing public unrest and possibly contributing to lots of crime, instead of keeping it at a reasonable or bare minimum. He shows people that he and his officers are corrupt criminals and paints a picture that people can be like this and if people look up to them or strive to be like them, then following them causes people to act like jerks and commit crimes instead of being noble and upright.

I have personally seen them have this effect on people, and the next thing you know children fresh out of high school are ruining their lives due to the example being set by the corrupt police authorities, for example. They are way too out in the open to the public about how corrupt they are and it is brainwashing the people, causing more crimes, which seem very similar to terrorism as defined in the F.B.I. protocols.

People can react in adverse ways to its own government when treated like this, which is why the F.B.I. claims to investigate public corruption.

My case has been above ground for a long time, and everyone knows about the crimes and abuse involved to my daughter, enforced by and neglected by the local authorities. As I said, they love to abuse people, not do their jobs, rob the state of money, and avoid fulfilling their public service duties. Many are scared she will be ritually sacrificed, and the authorities flaunt their power over allowing this abuse. Many are mentally scarred and damaged by this. I have been nothing but harassed to an extreme degree ever since.

I have been scared to stay at my house, have been so buried in paper work, and trying to clean up the mess from them not doing their jobs, allowing abuse, bullying me, me trying to create my case, that I have been working for free practically doing their jobs, and essentially I'm unable to work for my own pay on anything other than this calamity. My life is temporarily being ruined and I am in need of investigators, a legal team and financial assistance. My health has been suffering due to the interference this has posed on my life. I had my sights set on being a lawyer and was going to school and planning on doing many great things for this country. This corruption has interfered with my schooling, and I often wonder, as a good person with nothing but good intentions what I did to deserve this. I was an amazing mom who ran a preschool daycare from my home, and often babysat other children. I wanted my daughter to be as successful as your daughter someday. I always thought she turned out well and admired families like yours who help their children turn out well, raise them right and succeed. I come from a German background with nothing wrong with my genetics unlike my child's father,

which I had no knowledge of his genetic brain disease until the abuse from him grew greater during and after my pregnancy. I had everything in place to give my daughter a good life. Me and my family were going to have her start going to a private school locally, for the privileged, and plenty of extracurricular and educational activities. I just wanted a normal life for us, where we could succeed and live the American dream. I didn't get to start out well due to harassment from locals. The police were harassing me at my house incessantly, trying to get me kicked out while I had her, which forced me to have to stay with my grandmother until we got the police harassment to stop, for example, so they were not supporting of me raising my daughter right. They were almost always hostile around her and I, which I found rude and disrespectful. Where I'm from you always put women and children first and I had never seen such atrocities like the maltreatment from authorities in Peru.

I am buried with legal problems which take a lot my time now, and my health is suffering. I am fearful for my safety. Being around here, and no time to work or go to school as usual due to overload of court documents and problems from them, I am having a hard time moving away from here as I feel would be of benefit to my overall health. I have yet to get the stalking gunmen who are threatening my life investigated by the police or to leave me alone. They both expressed mental illness to me, one a schizophrenic who one day slashed my tires and police officer tires, in what he says was an effort to get thrown in jail so he wouldn't feel like following through and killing me as he claimed he was ordered to do by a local politician, he said. They left him out on the streets where he went on a criminal rampage for a week at several businesses, where he threw rocks through windows and harassed people. He was said to be armed and dangerous, having a knife, gun and mental disorder and labeled a huge gun threat to Police on Police records. Another gentleman who lives two blocks away from me, told me he was possessed by the devil, the antichrist, he worked for the authorities secretly, he had multiple personality disorder, felt like killing himself and others, and then next was harassing me in public and writing songs about shooting people and posting pictures with weapons on his social media sites. He is a criminal drug user with a mental disorder, delusions, hallucinations and expressions of desire to kill alongside pictures with weapons. He sent his three friends after me to beat me up or worse. This went completely ignored by police. The police yelled at me when I tried reporting this to them, claiming I was harassing them, and took their side. They do nothing to keep criminals like this at bay, or diminish the harm potentially caused by them, despite probable evidence being there with the crimes by these people. No arrests were ever made, or investigations, or consideration for the mental health, gun and knife problems. This is believed to be because the police wouldn't want to validate me, by solving crimes pertaining to me, because the chief of police greatly dislikes me. As I expressed earlier, he formed an extreme case of misogyny after the break up with his wife. It is one thing to be that way, but another when you choose to do so at the expense of your job, and the

safety of officers and the community. That is evident of a concern for the chief of Police's mental health, and need to be replaced. I have suggested case transfers but he hates me too much to do even that, so instead he chooses to let crime run loose as he sticks to his passionate desire to express his distaste for me at the expense of his communities safety, which is the complete opposite of his job.

There is collusion I believe, due to the father's parents working for the city of Peru, yet the case was never transferred, neither by police or DCFS to a county capable of helping.

Any matter pertaining to me gets ignored by police at the expense of the safety of the community. Just because a criminal's family knows the police, doesn't mean they are allowed to be a threat to society. The police labeled the one, Stephan Cullinan, a gun threat to police, claiming they were afraid of him. The other, is Zachary Savitch. The Chief of police, seems afraid of investing or doing his job, he appears not only rude to women but afraid of them, like he can't handle himself, or his job, or his community, or guiding them or being adequate at all. He just lets crime go unhandled, and spiraling out of control.

I talked to Private instigator Ron Davino, of Chicago who told me there was evidence of child pornography, sex clubs and murder threats from the father, Kevin Kramer's phone and contacts from it, and that the father was being investigated by other counties for missing persons investigations.

The police admitted to the judge in the family case that they gave they father's family money, while investigating abuse and nothing was ever done to protect the child. With a physical brain disease caused by chromosome damage, they cannot control the way that organ works, and it is no telling what they'll do. Kevin's mother's brother lives in the home with them with severe catatonic schizophrenia, and is almost paralyzed by the brain disease which runs in the men in the family.

The authorities don't appear to be running well. They seem to avoid following their job protocol. People looking to start their lives in law or move forward with their lives, are stricken in awe of the corruption and entrapment from authorities. This borderlines treason and terrorism, because they, by example, punish good behavior and reward and commence bad behavior, which can have a horribly negative effect, close to inner country terrorism.

The F.B.I. knowing of this and taking a long time to investigate, can appear the same way. When people are aware there are crimes that need investigating, and no help is being offered, and people are suffering, when in other counties justice is served immediately and people are punished for allowing or not reporting such things, it becomes mentally abusive and is unfair. People become desperate and feel there is no room to grow. There is no health and only degradation, calamity, abuse and personality disorders form authorities

When the police and F.B.I. are aware of abuse to mom and child, and threats to both of them, even if the F.B.I. who at times takes a while to investigate, no services are offered

meanwhile and this is allowed to go on, it appears like they are contributing to the abuse and threat threats of murder. When an emergency service doesn't act quick enough, people can die, and in this case, both of our lives are threatened. I don't know if I will get to see my daughter again. My child's father with his mental disease who has also expressed suicide to me, had a hard-enough time functioning already and this situation forced on him by authorities is stressing him out and due to his weakness, he is a vulnerable victim.

The authorities are forcing her to be abused, torn from me, kidnapped, and are legally enforcing her to be in a place of abuse, and neglected by me. This is a public atrocity, which paints a picture to the people of where they stand, and how they won't help, which creates more crimes and problems and people suffering which go unsolved. The authorities aren't willing to do anything about it around here and are guilty of crimes and abuse themselves. I know personally another little girl who was neglected by DCFS locally. There are severe problems around here and have been for a long time.

If there is any way, I am asking for an investigation, temporarily.

This is just a brief letter, without all of the details. Although it sounds like a lot, my caseload is much for me to bear. It takes up nearly all of my time, which I am unable to afford at this point.

They have tried to destroy my life, and due to the threats and mentally unstable gun men, I do not feel safe in my home and was wondering if there was any help you could accommodate me to help me afford lawyers, or investigators, and get my case done, or potentially order the F.B.I. to investigate, assign helpful services like lawyers or doctors, for example for the child.

She apparently has medical issues, from abuse, and the father has consistently denied her medical care.

I fear for hers and my safety.

Most Sincerely.

Julia Eickmeier

1(815)-579-5773

LaSalle county, Illinois is primarily infiltrated with catholic churches. As many people know, a lot of corruption including sexual and other child abuse can occur within the Catholic church. Such abuse has been documented throughout history to have heinous effects on the human psyche.

Not too long ago, there was a case in Joliet, Illinois taken against the Arch Diocese there. A boy who was molested by a Priest there, had struggled after the fact. He later became a Lawyer and sued the Priest.

He won the case, and the Priest was sent to Prison.

Sexual abuse is illegal for very good reason.

Many times, people take cases against Priests, and win, and the priests or sexual abuser, will go to Prison.

It is an illegal act within the Catholic church and without. There are arguments some Pedophiles may use to excuse themselves for being criminals such as religion, but none the less cases are taken against them and they still loose and are criminally punished for the crime called sexual abuse.

Sexual abuse can cause so many terrible things, and very little times, is there ever any record of anything good stemming from such atrocities.

I can see this as being fact with LaSalle County. I contribute a lot of their problems to the majority of Catholic Churches there.

Side effects of sexual abuse range dramatically,

The can be subtle, yet harmful, such as:

Personality disorders, mental disorders, emotional disorders, struggles, drug addiction, addictions, alcoholism, distorted reality, Suicidal tendencies, anger, rage, psychopathy, schizophrenia, criminal behavior, increased likelihood to abuse or commit crimes and wind up in the juvenile or prison system, higher chances of failure, shame, guilt, and many things causing minor to extreme forms of problems.

These can play out later in life in a very negative way, where one may become a psychopath or sociopath and desire to harm people to get revenge, vengeance, harmful and abusive personality, narcissistic personality, inability to connect or relate or empathize (sociopathy). This is a form of dumbing down of the mind, where there is damage done and the individual deprives themselves the ability to think, in effort to avoid the memories or the painful thoughts from experiences, and this turns into a habit of not using the brain, and eventually, and lower intelligence rate.

People learn how to be corrupt, become abusers themselves, have a higher chance of abusing or hurting others and ruining their lives or contributing therefore to their lives in very unnecessary negative ways.

These people with damaged brains, and damaged emotions and damaged mentality from abuse can turn into loose cannons, where they attempt to even murder some people and can be capable of very criminal behavior.

This is no excuse to allow criminal behavior inside a church, when the negative results on society are so grand

Some of the more severe side effects of sexual abuse are things such as, inability to reproduce, damaged sexual organs, venereal disease, death, suicidality, genital Trauma, all forms of irreversible trauma,

severe mental disease and impairment, premature pregnancy, disfiguration, tears, scarring, bruising, mutilation, etc.

All of these things are unnecessary and avoidable.

In an area, like LaSalle county, where there is a surplus of Catholic churches and not enough reliable government, problems are likely to arise.

Sometimes victims of abuse are not taught morals, do not have a moral compass and are not aware of right or wrong. This makes it harder to feel like they belong or fit in, and they may want to impose the hurt they suffered on everyone else.

This represents a lot of the authorities in LaSalle-Peru.

These abused individuals, may strike or act out in anger and revenge later in life, and become incredibly criminal and hostile and abusive themselves.

This is a huge avoidable risk, dangerous and hurtful to people who have to experience this yet, unfortunately, these are the authorities of Peru, Illinois.

There is no balance, let's say to ration out the amount of potential abuse through the churches, and reasonability among the general population there to eliminate a lot of problems and harm caused by abuse.

When so many people go to these churches, and so many are possibly abused, there become overall, generally, dazed and confused and out of touch with reality.

From an outsider's perspective, I can understand the hostility and abuse from a lot of people there, because as probably most of them were abused, they have deep underlying emotional scars that they take out on others which plays out as hostility and rage.

Again, sexual abuse is very illegal, for so many valid reasons. It destroys the mind of the abuser.

In satanic cults where it is common to abuse and harm a victim, it is common, as with a sacrifice. But this should not be the mainstream society as it is with LaSalle Peru Illinois.

Governmentally speaking, the law is the law, and people are afforded their civil rights. The constitution was made to uphold and law in place to keep people safe.

When too much corruption in a county is caused by damaged minds from abuse in the catholic church, the general society there will be plagued and unable to thrive, protect, help or abide by the law.

Often, there is criminal behavior from authorities in Peru.

This is a side effect of abuse, where here for example, even the law is spelled out, as well as their job protocol, yet they are so mentally damaged that they just go about instilling their evil and corrupt ways on society which stems from deep rooted anger and shame.

This is why sexual abuse is wrong.

These emotionally wounded people continue the cycle of abuse and instead of upholding the law or doing their job and protecting society, all hell breaks loose, and they are not able to do their jobs.

There is no justice or sound government there.

These individuals, who are corrupt and harming people, and are victims of abuse themselves, need therapy. They are emotionally damaged, and hurt people hurt people.

Towns, where the law is upheld, or there are not a lot of catholic churches, you do not see this type of corruption.

If you let abuse terrorize a town like Peru, stemming from the catholic church, you may have small leagues of abusers trying to avoid the law, and impose their self-coping mechanisms as to why they were abused and enforce or allow abuse to others, and it is a never ending disastrous cycle.

Chief of Police Douglas Bernabei as well as many authorities over there, are guilty of corruption, committing crimes, and allowing extremely harmful things happen to people over there. They seemingly allow and welcome crime.

This appears to be an effort to cope with the general consensus of abuse to them over there.

Although they may not be able to see outside the haze of their abusive community, There is light outside of it.

The united states is a lot bigger than that and does not deserve to inherit the harm and mental disorders instilled in people that such abusive counties like LaSalle county create.

One of the many reasons abuse is illegal is that it forms mental disorders, where people break down and go and shoot up a school, develop psychopathy, schizophrenia, from feeling afraid and that they cannot rely on their government, or that they felt their government was supposed to help keep them safe and they are the ones allowing abuse to them.

This is dangerous to the united states to be allowing creating of this type of individual.

The abused people obtaining positions of power are showing this behavior by terrorizing the community like Douglas Bernabei does, and people become mentally abused and afflicted with all kinds of health problems.

He is extremely hostile and abusive and being around that type of person in general can have negative results on the mind and body. Here

We have an abused chief of police, who struggle with his own reality. He does not know right from wrong. The difference was never instilled in him. All he was shown was abuse and criminal behavior and law breaking. He instills this in his people. He is not willing to rise and see above the abuse and terror. He is not willing to obey or uphold the law and everyone suffers.

He does this to cope, so he doesn't feel alone. A lot of abused people do this. They hurt others because they don't want to be the only ones abused.

He is severely mentally damaged. The area doesn't have psych hospitals to balance out the insanity and mental disease instilled in the people.

I have been made aware of two-gun threats, one a severe threat to police, allowed to run rampant on the streets and continuously commit crimes. The streets are not safe and there is a general community feeling of unrest. It is not healthy.

When a chief of police makes efforts to show his disdain to a reporter, me, by allowing a gun threat to me, and the police and the community, then that is evident enough alongside the many other horrible things he does, that he is damaged and there is something wrong with him.

I was made aware from several individuals in Peru, who struggled with criminal tendencies that they expressed mental disorders, and they were allowed to continue with their criminal behavior unreprimanded and completely ignored by police. The general area is unsafe, and people are showing more mental disorders and crime. Mental disorder and abuse are common from people there. I have witnessed people with extreme psychopathy and schizophrenia, where even when taking medication, they are on the extreme scale of psychopathy and needing of further help and services. They act out abusively and criminally. They are being taught this by police. The very own police, are abusive, and showing by example, for people to be this way, and the area goes crazy with abuse, insanity and injustice. This is also why you don't put criminal mental disordered individuals in charge, because they set the tone and teach others to be evil by leading by poor example, due to their own inability to function or cope. The country need not enforce people to look up to someone like this who needs help.

The hostility and rage I have experienced there have had a horrible effect on my health and I feel so bad for the people there. They do not deserve this.

The area is really hurting, and without a chief of police of reason, and willingness to balance out things, or maintain justice the community will never be able to deal with the potential threats of the catholic church or cleaning up the mess thereof.

When you have an abused and deranged person in charge of overseeing things, and they are afraid to do that because they are afraid to address reality, or maintain their position of authority effectively because of this, it is a disastrous combination.

Just because sexual abuse happened to these individuals, doesn't mean it is right, or that the effects are good.

I think they try to prove a point to allow it by their actions saying, well it happened to me, so it must be good. If it happened to me although it was illegal. They want so desperately subconsciously to be told otherwise and allow abuse on the community until someone apologizes for abusing him and not instilling morals in him and tells him it was wrong. Some people can struggle with what they were shown was a way of life, that they are not mentally or emotionally mature or capable enough of handling a job like chief of police or overseeing a town especially when minimizing the threats to community safety is necessary and they are unwilling to do this.

The catholic church theory, lack of balance or justice, lack of psychological help there, lack of decent authority, could be a good explanation to the hurt that LaSalle county is experiencing right now.

People can hurt for centuries from abuse, which even though it can happen in the catholic church, it is illegal and does, can and should get prosecuted.

The mental disorders and psychopathy created from it are not safe the united states and LaSalle county needs help to minimize the harm its allowing to its people and the dangerous weakening effect it is having on the united states.

An affordable solution such as new authorities, who are fresh, and with a military background form out of town with good ratings to come in and clean up the mess would be adequate. Severely minimizing the abuse within the catholic church there by this would also be good. Implementation of psych wards in an area where such severe mental and emotional problems are prevalent and being forced on people is of utmost importance to protect the security and stability of the united states and its people.

Although these people are hurting, it is time to stop the abuse.

It is 2018, and we can and must do better. It is sad that these people could not rise to the occasion but outside authorities need to step in, see the problem, be the bigger person and clean up the mess before it continues to cycle dangerously out of control. Preserving and protecting the American people is of severe importance as seen with war, and it is also necessary to do so and clean up communities like LaSalle Peru to keep the people safe and avoid the severe complications that psych disorders caused by abuse can contribute to. They are a threat to the safety of the united states, and this must be addressed.

This is not time to feel sorry for a guy and allow a community to be terrorized beyond belief. This is dangerous to the country. People retaliate in dangerous ways and contribute to harm for centuries. It is stupid and avoidable. These jobs need to go to the best people capable of carrying them out.

This sad case proves the theory that authority figures need to be severely mentally and psychologically tested before obtaining positions of power. Personality tests like brain scans and personality tests can rule out or tell of things like sociopathy, psychopathy, pedophilia, and further tell of more criminal tendencies of such an individual and define whether or not they would be a better fit for the job than someone else.

With so much money and time going into having the best president and protecting the country through wars, it is necessary to make sure the country has the best and doesn't have a terrorist as a leader who would terrorize a town and thus the country because of an underlying mental disorder.

This weakens the united states and makes the country, county and government responsible. They should not have to pay for this avoidable loss. We as a country must enforce hiring of better capable authority figures, so that the county is not at fault for allowing such mistakes or atrocities. After all, these people represent the government. We can try to make excuses for them and forgive them but allowing crime at a state or government level due to a mental disease is uncalled for. As hard as it may be to fire someone, immediate replacing of these people is of dire importance.

A mental diseased, should not be the governments fault. When hiring a chief or mayor, and we overlook this possibility, it becomes the governments fault, and we shouldn't allow people with mental disease into office because of this. That is why it is important to scan them first and pick the best match. If a person is diseased and criminally inclined, atrocities can be avoided form not letting them wreak havoc on a town due to their disorder. That is only fair for America and generations.

There are so many mentally damages people in Peru, and mental disorders among the people there. It is a really sad place, and this is why.

Please help the country and help make Peru, a safe place for all.

Lasalle county, Illinois is primarily infiltrated with catholic churches. As many people know, a lot of corruption including sexual and other child abuse can occur within the Catholic church. Such abuse has been documented throughout history to have heinous effects on the human psyche.

Not too long ago, there was a case in Joliet, Illinois taken against the Arch Diocese there. A boy who was molested by a Priest there, had struggled after the fact. He later became a Lawyer and sued the Priest.

He won the case, and the Priest was sent to Prison.

Sexual abuse is illegal for very good reason.

Many times, people take cases against Priests, and win, and the priests or sexual abuser, will go to Prison.

It is an illegal act within the Catholic church and without. There are arguments some Pedophiles may use to excuse themselves for being criminals such as religion, but none the less cases are taken against them and they still loose and are criminally punished for the crime called sexual abuse.

Sexual abuse can cause so many terrible things, and very little times, is there ever any record of anything good stemming from such atrocities.

I can see this as being fact with LaSalle County. I contribute a lot of their problems to the majority of Catholic Churches there.

Side effects of sexual abuse range dramatically,

The can be subtle, yet harmful, such as:

Personality disorders, mental disorders, emotional disorders, struggles, drug addiction, addictions, alcoholism, distorted reality, Suicidal tendencies, anger, rage, psychopathy, schizophrenia, criminal behavior, increased likelihood to abuse or commit crimes and wind up in the juvenile or prison system, higher chances of failure, shame, guilt, and many things causing minor to extreme forms of problems.

These can play out later in life in a very negative way, where one may become a psychopath or sociopath and desire to harm people to get revenge, vengeance, harmful and abusive personality, narcissistic personality, inability to connect or relate or empathize (sociopathy). This is a form of dumbing down of the mind, where there is damage done and the individual deprives themselves the ability to think, in effort to avoid the memories or the painful thoughts from experiences, and this turns into a habit of not using the brain, and eventually, and lower intelligence rate.

People learn how to be corrupt, become abusers themselves, have a higher chance of abusing or hurting others and ruining their lives or contributing therefore to their lives in very unnecessary negative ways.

These people with damaged brains, and damaged emotions and damaged mentality from abuse can turn into loose cannons, where they attempt to even murder some people and can be capable of very criminal behavior.

This is no excuse to allow criminal behavior inside a church, when the negative results on society are so grand

Some of the more severe side effects of sexual abuse are things such as, inability to reproduce, damaged sexual organs, venereal disease, death, suicidality, genital Trauma, all forms of irreversible trauma, severe mental disease and impairment, premature pregnancy, disfiguration, tears, scarring, bruising, mutilation, etc.

All of these things are unnecessary and avoidable.

In an area, like LaSalle county, where there is a surplus of Catholic churches and not enough reliable government, problems are likely to arise.

Sometimes victims of abuse are not taught morals, do not have a moral compass and are not aware of right or wrong. This makes it harder to feel like they belong or fit in, and they may want to impose the hurt they suffered on everyone else.

This represents a lot of the authorities in LaSalle-Peru.

These abused individuals, may strike or act out in anger and revenge later in life, and become incredibly criminal and hostile and abusive themselves.

This is a huge avoidable risk, dangerous and hurtful to people who have to experience this yet, unfortunately, these are the authorities of Peru, Illinois.

There is no balance, let's say to ration out the amount of potential abuse through the churches, and reasonability among the general population there to eliminate a lot of problems and harm caused by abuse.

When so many people go to these churches, and so many are possibly abused, there become overall, generally, dazed and confused and out of touch with reality.

From an outsider's perspective, I can understand the hostility and abuse from a lot of people there, because as probably most of them were abused, they have deep underlying emotional scars that they take out on others which plays out as hostility and rage.

Again, sexual abuse is very illegal, for so many valid reasons. It destroys the mind of the abuser.

In satanic cults where it is common to abuse and harm a victim, it is common, as with a sacrifice. But this should not be the mainstream society as it is with LaSalle Peru Illinois.

Governmentally speaking, the law is the law, and people are afforded their civil rights. The constitution was made to uphold and law in place to keep people safe.

When too much corruption in a county is caused by damaged minds from abuse in the catholic church, the general society there will be plagued and unable to thrive, protect, help of abide by the law.

Often, there is criminal behavior from authorities in Peru.

This is a side effect of abuse, where here for example, even the law is spelled out, as well as their job protocol, yet they are so mentally damaged that they just go about instilling their evil and corrupt ways on society which stems from deep rooted anger and shame.

This is why sexual abuse is wrong.

These emotionally wounded people continue the cycle of abuse and instead of upholding the law or do their job and protect society, all hell breaks loose, and they are not able to do their jobs.

There is no justice or sound government there.

These individuals, who are corrupt and harming people, and are victims of abuse themselves, need therapy. They are emotionally damaged, and hurt people hurt people.

Towns, where the law is upheld, or there are not a lot of catholic churches, you do not see this type of corruption.

If you let abuse terrorize a town like Peru, stemming from the catholic church, you may have small leagues of abusers trying to avoid the law, and impose their self-coping mechanisms as to why they were abused and enforce or allow abuse to others, and it is a never ending disastrous cycle.

Chief of Police Douglas Bernabei as well as many authorities over there, are guilty of corruption, committing crimes, and allowing extremely harmful things happen to people over there. They seemingly allow and welcome crime.

This appears to be an effort to cope with the general consensus of abuse to them over there.

Although they may not be able to see outside the haze of their abusive community, There is light outside of it.

The united states is a lot bigger than that and does not deserve to inherit the harm and mental disorders instilled in people that such abusive counties like LaSalle county create.

One of the many reasons abuse is illegal is that it forms mental disorders, where people break down and go and shoot up a school, develop psychopathy, schizophrenia, from feeling afraid and that they cannot rely on their government, or that they felt their government was supposed to help keep them safe and they are the ones allowing abuse to them.

This is dangerous to the united states to be allowing creating of this type of individual.

The abused people obtaining positions of power are showing this behavior by terrorizing the community like Douglas Bernabei does, and people become mentally abused and afflicted with all kinds of health problems.

He is extremely hostile and abusive and being around that type of person in general can have negative results on the mind and body. Here

We have an abused chief of police, who struggle with his own reality. He does not know right from wrong. The difference was never instilled in him. All he was shown was abuse and criminal behavior and law breaking. He instills this in his people. He is not willing to rise and see above the abuse and terror. He is not willing to obey or uphold the law and everyone suffers.

He does this to cope, so he doesn't feel alone. A lot of abused people do this. They hurt others because they don't want to be the only ones abused.

He is severely mentally damaged. The area doesn't have psych hospitals to balance out the insanity and mental disease instilled in the people.

I have been made aware of two-gun threats, one a severe threat to police, allowed to run rampant on the streets and continuously commit crimes. The streets are not safe and there is a general community feeling of unrest. It is not healthy.

When a chief of police makes efforts to show his disdain to a reporter, me, by allowing a gun threat to me, and the police and the community, then that is evident enough alongside the many other horrible things he does, that he is damaged and there is something wrong with him.
